

On-Board Weighing Systems

Automated Wireless Weighing & Control Solutions for Agriculture

Intercomp's On-Board Systems, with RFX™ Wireless Handheld Controller, Combine Equipment Function Control & Weight Viewing

Providing solutions to the Agricultural industries has been a part of the Intercomp family of solutions since 1978. We offer a wide range of scale options to meet most any agricultural application. In addition to portable wheel load scales offerings, our custom load cells for on-board applications are designed for use with most equipment.

When combined with the Handheld Controller, our weighing systems offer users the ability to not only view weights, but also control equipment functions as well, enabling single person operation and load monitoring. Intercomp's On-Board weighing systems feature RFX™ Wireless Communication for improved safety and reliability with a line of sight of up to 300 feet.

advanced weighing technology ... by any measure

On-Board Weighing Systems

RFX™ Wireless Handheld Controller Programs Equipment & Scale Functions & Displays Weights—All in Real Time!

Intercomp's On-Board Weighing & Automated Control Systems with RFX™ Wireless Communication Offer a Complete Solution

Compatible with a variety of equipment, the system accurately monitors loads to efficiently manage your inventory and material.

The AG Scale Indicator Processes the Weight Data & Transmits to the Handheld Controller via RFX™ Wireless Communication/Protocol

Fully Electronic Shear Beam & Custom Load Cells to Fit Most Applications

The **AG Scale Indicator** and **Control Box** enable the on-board weighing system to communicate with various devices in real time with a clean non-intrusive install.

RFX™ Wireless Technology Allows:

- Multiple Systems to Communicate via ONE RFX™ Wireless Protocol from ONE Handheld Controller
- ONE Operator to Monitor & Control All Scale & Equipment Functions Directly (or Remotely) from the Filling Location (Planter)

Intercomp's RFX™ Wireless **Handheld Controller**, ideal for Seed Tender applications, combines wireless scale control operation and weight viewing with the ability to control seed tender functions all in one handheld wireless remote.

- Control Auger Movements
- On/Off Control
- Open/Close Gate
- Preset BIN Weights to Track Amounts
- Auto Dispense Preset Amounts
- Zero Scales

Intercomp offers a full line of Shear Beam **Load Cells** specifically designed for on-board weighing systems. These load cells provide a cost-effective, accurate solution to track your material in both pre-existing and new applications.

- Fully Electronic
- Shear Beam Design
- Minimize Increase to Height of Vehicle
- High Capacity & Custom Configurations

See back page for Intercomp's On-Board Weighing System indicator options.

RFX™ Wireless Indicator Solutions to View, Monitor, Control & Process Loads

RFX™ Wireless Handheld Controller

- Control up to 20 Equipment Functions with Optional Control Box
- Wirelessly Control Scale Functions
- BIN Menu to Preset & Track up to 10-Individual Bin Weights
- Automatic Dispense of Preset Amounts
- Adjustable Communication & Backlight Settings
- 300' Line of Sight Communication
- Comes with Protective Rubber Boot, Lanyard, Belt Clip, Case, & "AA" Alkaline Batteries

RFX™ Wireless AG Scale Indicator

- Transmits Weight Data via RFX™ Wireless Communication to RFX™ Handheld Controller
- BIN Menu to Preset & Track up to 10-Individual Bin Weights
- Digital Load Cell Diagnostics
- Serial Output for External Display
- Accepts Multiple Load Cell Inputs
- Can be used with In-Cab Host Indicator Version

Options/Accessories

Control Box

- Control up to 20 Equipment Functions
- Open/Close Gate
- On/Off Control

iPad Apps

- View & Save Weights
- Export all Data to a Spreadsheet for Future Analysis—Send Saved Reports via Email
- Future Cloud Based Reporting
- In-Cab Indicator Option

LED Remote Display

- Wireless Communication with RFX™ Data Converter
- 6-Digit, 2" (51mm) or 4.5" (115mm)
- Alpha/Numeric LED Display
- Weatherproof in NEMA-4x Encasement

NOW PLAYING!

Intercomp designs and manufactures weighing and control systems for a variety of applications. From on-board scale systems utilizing shear beam load cells and electronic indicators; to equipment control solutions with our latest RFX™ wireless control technology; Intercomp provides advanced solutions for today's latest equipment in the agricultural industry.
