

# **PW800™ Pallet Truck Scales**

Cost-Effective Solution to Weigh and Transport Goods

Made in U.S.A.

## ***Weigh & Count Inventories with Economical Means to Transport Goods in Tight Spaces***

The PW800™ is the preferred choice for Pallet Truck Scales because it integrates load cells within the existing forks. These load cells offer the industry's highest standard capacity at 5,000 x 1lb (2,500 x 0.5kg), with an accuracy of  $\pm 0.1\%$ , combined with the lowest profile forks at 2.9" (74mm).

The scale runs on nine D-Sized Alkaline or NiMH rechargeable batteries for up to 400 hours. The 1.5" (38mm) LED display and membrane keypad provide increased visibility and functions for gross/net/tare and parts counting. All electronics are shock mounted and contained in a rugged and durable enclosure.
