FOR IMMEDIATE RELEASE

Intercomp's Wireless Seed Tender System with Handheld Controller Combines Wireless Weighing and Function Control All in One!

Minneapolis, MN – Intercomp's RFX™ wireless seed tender system, with handheld controller, combines wireless scale control operation and weight viewing with the ability to control seed tender functions wirelessly all in one handheld remote.

The controller allows the operator to number individual seed boxes/bins with preset weights to accurately know the seed weight remaining in each box/bin. With the handheld controller, the operator may control up to 16-functions on the seed tender, and utilize the 'Automatic Dispense Mode' to automatically shut down the conveyor/auger when a preset dispense seed weight is reached.

Whether filling central fill, or row planters, Intercomp's RFX™ wireless technology, with the handheld wireless controller, increases productivity to accurately track seed weights, and improves safety and efficiency with the ability to remotely Start/Stop the auger/conveyor, or operate other tender functions.

For further information, contact Intercomp's Sales Department at 800-328-3336 or Worldwide +1 763-476-2531, Fax 763-476-2613 or write Intercomp, 3839 County Road 116, Medina, MN 55340-9342. Contact us by E-mail at info@intercompcompany.com or visit us on the web at www.intercompcompany.com.
