

### Robot Planning Platform

**Hypertherm**, Hanover, New Hampshire, introduces the Robotmaster V7 task-based robot programming platform built from scratch on a completely new architecture. Designed to make robot programming easy and intuitive, the new programming platform builds on the performance of Robotmaster's

offline programming CAD/CAM software. Robotmaster V7 includes integrated CAD/CAM functionality and can be used by welding, cutting and other process experts without buying or learning complex software.

### Portable Alignment System

**Intercomp**, Medina, Minnesota, presents the AS2000 Alignment System, a portable, affordable and profitable alternative to alignment racks. The system can help produce high-quality results, without the need to dedicate an entire bay to alignment service. Four rim clamps with digital caster/camber gauges and integrated lasers, two turn plates and two rear tire spacers allow technicians to adjust suspension components to achieve optimal wheel alignment. Optional wheel

stand levelers allow the system to be used with a 2-post lift.

### Push-Pull Welding Gun

**Lincoln Electric**, Cleveland, offers the Magnum PRO Aluminum Pistol-Grip, Push-Pull Gun that enhances aluminum push-pull welding operations with features aimed at reducing downtime and increasing productivity. Push-pull wire-feeding technology reduces friction, ensuring smooth feeding and minimizing wire damage. A quick-change liner and removable drive-roll cover provide easy access to wire and drive rolls, while a lightweight, ergonomic handle makes heavy-duty work simpler.

### Variable-Speed Polisher

**Alpha Professional Tools**, Oakland, New Jersey, presents the ergonomically designed VDP-700 Variable-Speed Polisher. Comfortable to hold and easy to control, the polisher includes two handle designs that come with the unit—C-handle and side handle. With a variable speed range from 700 to 3,500 rpm, the unit is built with a 1,250-watt (rated) and 1,900-watt (maximum) motor and heavy-duty precision gear system for reliability and performance. A 25-foot, 14 AWG electrical power cord is included.
