FOR IMMEDIATE RELEASE

RFX™ Wireless Indicator Receives Bluetooth® Technology Enhancement

Minneapolis – New for 2020, Intercomp has added Bluetooth® Technology to the indicator in all RFX™ Wireless Scale Systems. Live weight data is now securely transmitted from the indicator to the user's Bluetooth®-enabled mobile device with the Intercomp iRaceWeigh™ app installed. The addition will be a standard feature for all scale systems produced after Jan. 1, 2020, but retail prices will remain the same as in 2019.

Wireless communication from scale pad to indicator will continue to rely on our encrypted, field-proven RFX™ Wireless Weighing™ technology. The Bluetooth® chip simply allows data sharing with one iOS or Android mobile device. The prevalence of Bluetooth® Technology in smartphones and tablets means any of these devices can easily become a second indicator.

Like RFX™ communication, only those with the proper digital credentials can access weight data from a mobile device. During the connection process, radio and encryption settings are required to access the data stream. This ensures only approved users, not the competition, can share corner weight information.

Part numbers for all scale systems that utilize an RFX™ Wireless Indicator as standard equipment have been updated. Top-selling examples include the [SW777RFX™ Professional](#) and [SW650RFX™ Quik Weigh](#) Scale Systems, in addition to all [Microflex™](#) and [RFX™ Wireless Precision Hub Plate](#) Scale Systems. Find additional items affected by the update at IntercompRacing.com or contact your preferred Intercomp dealer with questions.

For further information, please contact Intercomp Racing Sales at 800-328-3336, worldwide +1 763-476-2531, fax +1 763-476-2613 or write Intercomp, 3839 County Road 116, Medina, MN 55340-9342 USA.
