## **FOR IMMEDIATE RELEASE**

### **Aircraft Manufacturer ATR Chooses Intercomp Aircraft Platform Scales for Weight and Balance at European Location**

Minneapolis, MN – Adding to the worldwide list of airframe manufacturers that use their aviation scales, Intercomp is pleased to announce placement of platform scales with Toulouse, France based ATR Aircraft. The fully electronic, certified intrinsically safe AC40-LP low profile platform scales provide ATR Aircraft with the latest aircraft weighing technology for ATR 42 and ATR 72 series airframes.

The AC40-LP platform scale system uses shear-beam load cell technology - the most accurate and repeatable means for weighing aircraft. Intercomp GaugeSense™ technology incorporated within the AC40-LP scales eliminates the scale warm up time, the need for centering of tires, and reduces time between weighing. This results in significant time savings for each weighing procedure in contrast with other manufacturer's older, hydraulically actuated, piezo-sensing scale technology.

As the manufacturer of the equipment most widely used by airlines, MROs, and airframe manufacturers in the world, Intercomp continues to provide state-of-the-art, fully electronic aircraft weight and balance equipment unmatched in quality, performance, and support.

For further information, contact Intercomp's Sales Department at 800-328-3336 or worldwide 763-476-2531, fax 763-476-2613 or write Intercomp, 3839 County Road 116, Medina, MN 55340-9342.
