FOR IMMEDIATE RELEASE

AX900™ Axle Scale Systems Available with Fully Integrated RFX™ Wireless Weighing Technology!

Minneapolis, MN – Intercomp announces AX900™ Axle Scale Systems are now available with fully integrated RFX™ Wireless Weighing Technology! This time-saving, cable-free operation improves safety and efficiency and is made possible by embedded radios enabling wireless communication to a variety of devices, while digital output still allows for cable backup. Calibration is stored at the scale providing users with interchangeability of all components. Alternatively, users are able to interface their own indicator to the scales using analog output versions. For customers whose local regulations prevent the use of any wireless radio communication, radios can be disabled or you can select from hardwired alternatives.

AX900™ Scales are available in a variety of lengths, capacities and configurations to weigh anything from single to multi-axle vehicles. They feature a 3.6" low-profile overall height for easy loading, and are used by law enforcement agencies throughout North America as well as, trucking companies, militaries, scrap yards, waste transfer stations and other transport businesses for quick, effective and dependable gathering of axle, group and gross vehicle weight.

The AX900™ series utilizes stainless steel, hermetically sealed shear beam load cells that are certified to 5,000 divisions by the U.S. National Institute of Standards and Technologies to ensure unparalleled accuracy, easy maintenance and increased longevity.

Intercomp Company is an ISO 9001:2008 registered electronics manufacturer based out of Minneapolis, Minnesota with offices in the United States and the United Kingdom, proudly serving the Industrial, Racing, ITS/Enforcement, Aviation, Military, Agriculture, and Mining and Aggregate industries worldwide. They design scales for most any weighing application, always keeping an eye on the future.
