FOR IMMEDIATE RELEASE

NEW Lightweight Scale Rack and Ramps from Intercomp!

Minneapolis, MN – Intercomp Racing announces the release of their all new Quik Rack! This lightweight scale rack system is precision machined out of solid, super-dense foam, can hold up to a 6,000lb (2721kg) vehicle and provides a lower-cost alternative to metal rack systems. The high grip, rugged exoskeleton provides additional reinforcement, won't slip or slide out, and won't mark-up or scratch floors.

The system's modular design makes it easy to set-up anywhere providing you with enhanced flexibility at the track or in the shop. It is also fully adjustable accommodating a wide range of wheel bases and track widths and can be used with or without scale levelers. Perfect for racers, tracks, or racing organizations that need a portable and easy-to-set up rack system!

In addition to Intercomp's new Quik Rack, two new scale ramps have been released! Both ramp systems make rolling onto 2.5" tall scales easier and are lighter than metal alternatives. Both models save time, and make scaling cars more convenient. One even features a 12" roll-off area for unbinding suspension between adjustments.
