

Hypertech Inc.
Max Energy 2.0 Power
Programmer for '15-'16
Chevy Corvette 6.2L S/C LT4
 901-382-8888
www.hypertech.com
 PN: 2000

The Max Energy 2.0 power programmer's optimized engine tuning adds up to 51 hp and 45 lb.-ft. at the wheels along with other custom tuning features including cold-air intake tuning, disable four-cylinder mode, shift points, shift firmness, top speed limit, throttle response, shift response, torque converter slip, TPMS adjustment and speedometer correction.

Innovate Motorsports
LC-3 CAN BUS Wideband
Lambda Controller
 714-372-5910
www.innovatemotorsports.com
 PN: 3937

Innovate Motorsports says that the world's most popular standalone digital O₂ sensor controller has evolved. The LC-3's patented and award-winning DirectDigital technology and all-new advanced sensor control provides even more precise data, while self-calibrating circuitry compensates for changes in altitude, temperature and sensor condition.

Innovate Motorsports
MTX-OL Digital Wideband Air/Fuel
Ratio OLED Gauge
 714-372-5910
www.innovatemotorsports.com
 PN: 3935

Innovate Motorsports says that its MTX-OL is the most durable and accurate digital wideband AFR gauge ever. An all-new advanced sensor control receives sensor feedback more frequently and optimizes heater control for superior performance in forced-induction applications. The gauge features a high-contrast OLED display along with patented DirectDigital technology.

Injen Technology Co.
X Pedal Pro Throttle Controller
 909-839-200706
www.injen.com

X-Pedal Pro is a simple plug-in module that delivers immediate, customized performance for the vehicle. The X-Pedal Pro controls the throttle signals going into the stock engine control unit so that the vehicle instantly responds faster and accelerates swifter or slower and more economically.

Hotchkis Sport Suspension
'64-'70 Mustang Performance
Heavy-Duty Drop Spindle
 562-907-7757
www.hotchkis.net
 PN: 34118

Introducing the new Hotchkis Performance heavy-duty drop spindle for '64-'70 Ford Mustangs. Classic factory spindles are prone to failure. The new spindle corrects that issue by utilizing '05-'11 modern-Mustang-style pin, hub, rotor and caliper. Also featuring a 1-in. drop and a shorter steering arm for quicker steering.

Innovators West Inc.
LSx Belt Drive Timing System
 785-825-6166
www.innovatorswest.com
 PN: 5200

The new Innovators West LSx belt drive incorporates precision-machined gears, a billet-aluminum two-piece backing plate, and a two-piece upper pulley that provides adjustable cam timing of +/- 10 degrees. Also included are a high-quality Super Torque belt, a Torrington cam thrust bearing and an idler pulley for belt tensioning.

Innovate Motorsports
MTX-O Multi-Function CAN Bus
MTS OLED Display
 714-372-5910
www.innovatemotorsports.com
 PN: 3945

Innovate Motorsports' new MTX-O gauge maximizes driver information and dash space. With its high-contrast organic LED readout, the MTX-OL can display data from any MTS devices present, including temperature, pressure, lambda and more. The MTX-O display is 100% user-programmable and can data log to powerful LogWorks software.

Innovate Motorsports
MTS-LINK Individual Sensor
Controllers
 714-372-5910
www.innovatemotorsports.com
 PN: MTS4

The new MTS-Link series of individual CAN sensor controllers provides standalone control and data output for popular sensor types. Available sensors include engine rpm, vehicle speed, MAP sensors, pressure transducers and more. The MTS-Link is ideal for applications such as dynamometers, data loggers, standalone ECUs and digital dashes.

Intercomp
Thermal Imager
 763-476-2531
www.intercompracing.com
 PN: 175000

Intercomp's handheld thermal imager provides a cost-effective, portable, long-lasting and reliable way to spot unwanted heat and wear before a costly failure. That can easily mean the difference between crossing the finish line first or cleaning up after a catastrophic, multiple-system failure.
