FOR IMMEDIATE RELEASE

Intercomp Announces Release of Ultra-Low Profile Portable Weigh-In-Motion Scales

Minneapolis, MN – October 20, 2020 – Intercomp, the world's largest manufacturer of portable vehicle weighing and measurement products, announces its new LS788-WIM™ Portable Weigh-In-Motion (WIM) Scale System, designed with groundbreaking features and a highly-transportable, low-profile form factor.

The foundation of the new LS788-WIM™ Scale System is Intercomp's robust, proven strain gauge technology, offering superior field dependability, accuracy and ease of operation compared to hydraulic or quartz-based scales. With a total system capacity up to 60,000 lb (30,000 kg), the scales are deployed in a pair of easily transportable, aerospace-grade aluminum platforms that are solid-state, and offer wireless communication in reliable, solar-powered rechargeable operation.

Providing both in-motion and static weighing, the LS788-WIM™ delivers accuracy of 2% to 3% dynamically at speeds of up to 10 mph (16 km/h) and exceptional $\pm 0.5\%$ static weighing precision. The 35 inch (89 cm) wide low-profile scale platforms allow the LS788-WIM™ to handle dual-tired vehicles with ease. Used along with roll-up portable ramps, the system measures just 0.87 inches (22 mm) in height and can easily weigh vehicles either statically or in motion.

"The LS788-WIM™ System is our newest advanced, low-profile strain gauge scale designed for ease of operation, field accuracy and easy transport," said Jon Arnold, Market Specialist at Intercomp. "One person can set it up in less than 15 minutes, and the entire system fits easily in the back of a vehicle, making it the ideal system for rapid deployment in portable enforcement sites."

The LS788-WIM™ system features Intercomp's RFX® wireless-ready remote communication capabilities as standard, allowing the scale system to communicate weight data wirelessly to RFX®-enabled WIM indicators, displays, CPUs or PCs. With line-of-sight connectivity up to 300 ft (90 m), the technology facilitates multiple scales on-site while protecting the safety of officials on the ground who need no longer approach scales around moving vehicles to get a weight reading.

To learn more about the new LS788-WIM™ Scale System, visit intercompcompany.com or contact Intercomp at 800-328-3336 or worldwide +1 763-476-2531.

About Intercomp

Intercomp Company is the world's largest manufacturer of portable weighing and measurement products. Headquartered in Medina, Minnesota, Intercomp is ISO 9001:2015 certified, with manufacturing facilities in the U.S. and the United Kingdom. The company serves customers in aerospace, transportation, automotive, agriculture, material handling and numerous other industries through a worldwide network of dealers. Contact: Intercomp Company, 3839 County Road 116, Medina, MN USA 55340-9342; call +1 713-476-2531 or toll-free (US & Canada) 800-328-3336 or visit intercompcompany.com
