FOR IMMEDIATE RELEASE

HH60 RFX™ Wireless Indicator Receives Bluetooth® Technology Enhancement

Minneapolis – Intercomp has added Bluetooth® Technology to its HH60™ RFX™ Wireless Indicator. Live axle weight data is now securely transmitted from the indicator to a user's Bluetooth®-enabled iOS mobile device with the Intercomp iVehicleWeigh™ or iExactWeigh™ app installed. All indicators manufactured after Jan. 1, 2020, will have the chip installed as a standard feature, with current pricing remaining the same.

Wireless communication from scale pads to the indicator will continue to utilize our secure, field-proven RFX™ Wireless Weighing technology. The new Bluetooth® chip simply allows data sharing with one Apple® mobile device. In this case, a mobile device can easily become a second scale indicator, when needed.

Like RFX™ communication, only those with the proper digital credentials can access weight data from an iPad® or iPhone®. During the connection process, radio and encryption settings are required to access the data stream. This ensures only approved users can view axle weight information.

Part numbers used to identify and order the HH60™ will not change following the Bluetooth® addition. The ability to fully-control up to six RFX™ scales within a 300-foot line-of-sight radius, peak hold function, and the ability to store and print weight records are some of the functions that will continue to be available with this indicator.

For further information, please contact Intercomp at 800-328-3336, worldwide +1 763-476-2531, fax +1 763-476-2613 or write Intercomp, 3839 County Road 116, Medina, MN 55340-9342 USA. Feel free to contact us by E-mail at info@intercompcompany.com or visit us on the web at IntercompCompany.com.
