FOR IMMEDIATE RELEASE
Intercomp Scales Selected to Support Boeing's 787 Production

Minneapolis – Intercomp Company, a world leader in advanced weighing solutions, has been selected to supply precision aircraft scales to Boeing. This includes the delivery of several AC60-LP™ aircraft scale systems, designed to replace their legacy weighing equipment with state-of-the-art weighing technology.

The project will support Boeing's commercial aircraft production operations in North Charleston, South Carolina. The scales play a critical role in weight and balance verification of the aircraft prior to delivery to the customer, providing accuracy, reliability, and efficiency in aircraft manufacturing to meet airlines' desired performance specifications.

The selection follows a competitive evaluation process in which Intercomp's AC60-LP™ system was tested and validated in both the manufacturer's calibration lab and in weighing operations. The system demonstrated superior performance in terms of ergonomics, capacity, repeatability and ease of integration with Boeing's weight and balance processes.

"Intercomp's precision weighing technology continues to set the standard for the aerospace industry," said Jon Arnold, Applications & Product Manager at Intercomp. "Our solutions enable faster, more accurate, and more consistent results which supports the high standards required for modern aircraft production and maintenance."

Intercomp's aircraft scales are utilized by leading aircraft manufacturers and operators worldwide, supporting both commercial and military applications. This latest project further strengthens Intercomp's position as the industry's preferred weighing technology provider.

For further information, please contact Intercomp at 800-328-3336, worldwide +1 763-476-2531, fax +1 763-476-2613 or write Intercomp, 3839 County Road 116, Medina, MN 55340-9342 USA. Feel free to contact us by E-mail at info@intercompcompany.com or visit us on the web at IntercompCompany.com.
