FOR IMMEDIATE RELEASE

Intercomp Announces Weighing Solutions for Autonomous Trucks

Minneapolis, MN – Intercomp, a worldwide manufacturer of fixed and portable vehicle weighing and measurement products, has expanded their weight and balance expertise to the [autonomous trucking sector](#).

There is already considerable investment into safety testing, development, and validation of automated driving systems. Because vehicle weights have a dramatic effect on steering, maneuverability, braking and acceleration, weight and balance procedures are a critical part of any development program. There are several scale lines recommended for measuring autonomous trucks: LS630-WIM™, LP788™, LS-WIM™, and LTR788™.

The [LS630-WIM™ Portable Weigh-In-Motion Scale](#) is a hybrid system that brings together our experience in both WIM technology and our long history of developing innovative portable truck scales. The [LP788™ Low Profile Scale](#) features the same benefits as standard portable truck scales, with a lower overall height making it easier to drive onto the scale. The in-ground [LS-WIM™ Low-Speed Weigh-In-Motion Axle Scale](#) saves time by keeping traffic moving while accurately capturing weight related data. the [LTR788™ Dual Wheel Load Scale](#) is a recently developed product which was created for direct measurement of individual tire loading in a dual-tire configuration.

Intercomp utilizes highly accurate strain gauge load sensing technology which is widely accepted as the most accurate and reliable means to weigh a vehicle. Each Intercomp scale enhances research and development efforts, ensures safety compliance and regulation, and helps lead to better overall fuel efficiency.

For over 40 years, Intercomp has provided superior-quality portable and in-ground weighing systems, along with the highest levels of customer satisfaction, for a wide range of industries. As the axle-weighing specialist, Intercomp's static wheel and axle scales and dynamic weigh-in-motion systems are designed with the most innovative technology in the world.

[About Intercomp](#)

Intercomp Company is the world's largest manufacturer of portable weighing and measurement products. Headquartered in Medina, Minnesota, Intercomp is ISO 9001:2015 certified, with manufacturing facilities in the U.S. and the United Kingdom. The company serves customers in aerospace, transportation, automotive, agriculture, material handling and numerous other industries through a worldwide network of dealers.
