**FOR IMMEDIATE RELEASE**

## **Intercomp Digital Wireless Tread Depth Gauge Communicates with App**

Minneapolis, Minnesota - Intercomp Racing, the leader in precision measurement solutions and wireless scale systems for all forms of motorsports, proudly introduces our new [Billet Digital Wireless Tread Depth Gauge](#) for communication with our Intercomp TirePro™ Mobile App. This tool is a high accuracy measurement device that quickly and accurately records, displays, saves and organizes multiple tread depths readings to the App.

This technology greatly increases the speed and accuracy of your tire management program with Bluetooth® Wireless Technology to communicate directly to our TirePro™ Mobile App. The App can be used with a tablet or phone/device to quickly record and compare multiple tire tread depths of new and recently run tires.

This new gauge measures depth increments of 0.00005" (0.001 mm), and is an ideal tool for use at the track in the pits to aid in data logging and long-term tire data management. The large 0.5" digital display is combined with a Four Point CAD/CAM base design that is ultra stable and able to be easily viewed from any orientation on the tire. The base is machined from superior 6061-T6 Aircraft Grade Billet Aluminum and includes a Plastic Case with a high-density foam insert.

Intercomp's [Digital Wireless Tread Depth Gauge](#) has an accuracy of  $\pm 0.0003$ " ( $\pm 0.007$  mm), and can be used as a stand-alone gauge or can communicate to a device using the TirePro™ App. The flexibility of this system allows the collection of tire tread depth data on your own tablet or phone. This eliminates marking tread depths on paper pads or the tire itself, and the App is available for an Android™ tablet/phone or for use with an iPhone® or iPad® Device.

Intercomp's new [Digital Wireless Tread Depth Gauge](#) and our [Digital Memory Air Pressure Gauge](#) have streamlined tire data with an easy-to-use solution that delivers the greatest level of accuracy with your choice of device. Intercomp is the industry leader in tire and weight data and our field-proven wireless technology has proven this for over 20 years! To learn more about our cutting-edge measurement and scale systems, visit [intercompracing.com](http://intercompracing.com).

### [About Intercomp](#)

Headquartered in Medina, Minnesota, Intercomp is ISO 9001:2015 certified, with design and manufacturing in the US and facilities in the US, UK, Brazil and Singapore. For over 45 Years, customers in Aerospace, Transportation, Automotive, Military, Agriculture and many other industries have trusted Intercomp's products to provide reliable solutions for the most exacting applications.
